SAFETY is a powerful web portal dashboard that allows users to analyze and visualize electronic data in a variety of ways.

+ This dashboard is designed specifically for traffic safety professionals. It contains crash data including location-specific information and is individually password protected for use by official traffic safety personnel only.

+ SAFETY was developed at CAPS through sponsorship from the Alabama Office of Highway Safety.

FEATURES

+ Displays summary data
+ Performs dynamic analysis
+ Searches records
+ Applies filters to data
+ Generates maps based on GIS
+ Crash report viewer
+ Timeline analysis
+ Exports data, charts & graphs to Excel or image
+ Report scheduler – weekly, monthly, quarterly
+ Uses rapid CARE Processing Engine
+ Reporting tools – get reports emailed to you
+ Batch report downloads
+ Data sources updated nightly

For more information about developing a dashboard for your electronic data, contact Rhonda Stricklin at rstricklin@cs.ua.edu
