You are invited to the August 25th lunch in the Research Partners Lunch Series. The goal of the lunch series is to introduce research topics for the development of research partnerships across disciplines. These partnerships can serve as a foundation for interdisciplinary research endeavors, grant proposal writing, course development, and innovative research applications. Different researchers from across the University are invited to brief a research topic each month for potential research partners. The lunch will begin at noon and the presentation will begin at 12:15pm.

The Northern Beltline is a major transportation corridor to be built in Jefferson County, Alabama. Construction of an initial segment northeast of Birmingham started in 2014, and the entire roadway is estimated to be completed in 20 to 30 years. The presentation will offer an assessment of the potential for population and economic growth, driven by construction of this highway.

Kindly RSVP your attendance by Friday, August 21st via the link below so we can reserve your lunch.
